

Outbreak Identification

- Use the following definitions to determine if an A.G.E. outbreak is occurring:
 - Determine if A.G.E. case;
 - 3 or more episodes of diarrhea and/or 2 or more episodes of vomiting within 24 hours that is not readily explained by other known pre-disposing medical factors.
 - ≥ 2 A.G.E. cases occurring in a unit with initial dates of onset within 48 hours of each other
